

Self-Reliance India

- India can achieve 100% self-reliant because it is a vision of our honourable Prime Minister of India. 137 crore people of India trust on this mission but it is a very long process as India does not have rich resources like infrastructure , technology development are the main obstacles in this mission. Against it , we have man-power and Indian people have good self-confidence, courage and hard-workmanship to accomplish this mission.
- Education has a crucial role to play in making India self-reliant. So government came up with new education policy which empowers the youth of India to become Self-Reliant. If India has an advancement in the field of technology then youth of india can make an innovative products so that the foreign investments will increase this will help in the economic development of the country as well as youth development.
- As reference to the article in the mail about **Hurun Global Unicorn Index of 2020** . This article focuses upon the start-ups which have been founded in the past as well as current situations of start-ups in all over the world. USA leads with 233 unicorns emerged in 2020. India has 21 unicorns in 2020 and stands on 4th position among the rest of countries. Below is a glimpse of top 10 countries who emerges unicorn's all over world.

Table 1: Top countries and cities where the world's unicorns are based

Rank	Country	Unicorns		Rank	City	Unicorn
1↑	USA	233 (+30)		1-	Beijing	93 (+11)
2↓	China	227 (+21)		2-	San Francisco	68 (+13)
3↑	UK	24 (+11)		3-	Shanghai	47 (+0)
4↓	India	21 (+0)		4-	New York	33 (+8)
5↑	South Korea	11 (+5)		5↑	Shenzhen	20 (+2)
6↓	Germany	10 (+3)		5-	Hangzhou	20 (+1)
7↑	Brazil	8 (+4)		7↑	London	16 (+7)
7↓	Israel	8 (+1)		8-	Palo Alto	12 (+2)
9↓	France	7 (+3)		9↓	Nanjing	11 (-1)
10↑	Switzerland	5 (+2)		10↓	Redwood City	10 (+1)

- India has added 3 new unicorns to the list in this year. Paytm is the highest gainer in the Indian unicorn category. Out of 40 unicorns 36 unicorns are founded by Indians outside of India which is in the USA, led by the Bay Area, two in the UK, and one in each of Germany and Switzerland.
- Start-ups in India usually failed because there are many hindrances in our Government Policies. Mindset of people before 5 years is to do job because they don't have the support of government but now with the missions and visions of our Prime Minister they can think of starting up a new opportunities for their development as well as country's development. To prevent the failure of start-ups firstly Government should remove the concept of '**Inspector Raj**' from the country. One should get all the permissions for his/her start-up from a single window

so that no can have problems to start start-up. Secondly Government should give some relaxations to start-up like taxes, duties, GST, etc .

- In conclusion self-reliance is a progressive step for the development of country but it is a long process but nothing is impossible as India is a developing Country. So India has started making a baby steps to make economic as well as human development of country.
